## Company Profile

Huber Technology Middle East (FZE) is a subsidiary company of HUBER SE in Germany and was established in 2005. We are an ISO 9001 and ISO 14001 certified company and provide a wide variety of solutions for the treatment of wastewater, industrial water, process water as well as potable water.

### **Our mission is to protect the environment with sustainable water and waste water solutions.**

We are committed to a cleaner and greener environment and developing progressive technology for meeting the requirements of new and existing plants, municipalities and industries. Our products require minimum maintenance and are manufactured under the supervision of experts, ensuring high quality and long life.

Stainless steel is used for making all parts and products and is processed expressly to make it strong, durable and corrosion free. This requires special equipment as well as proper expertise. The hard work of well-trained and motivated staff and the use of state-of-the-art manufacturing machines make production process extremely efficient. In short, we at HUBER make no compromise on the quality of products and services. Customer satisfaction is of paramount importance here.

Our parent company HUBER SE's 30,000 main production factory and offices are located in Germany, in the State of Bavaria. The company has been family-owned for over 175 years. With its more than 60 subsidiaries, offices and partnerships worldwide, the company is now a market leader in wastewater/sludge treatment. HUBER has more than over a century's worth experience in this field, which reflects in every product and service that we deliver.

**HUBER invented and introduced the famous ROTAMAT® products and STEP SCREEN®s. With more than 50,000 installations worldwide and more than 1,500 machines installed in Middle East alone we have unmatched experience and expertise we can offer our customers.**

30,000 m<sup>2</sup> main production factory

#### BUSINESS DESCRIPTION:

**Supplier for industrial + municipal water, waste water and sludge treatment along with a wide range of stainless steel finished products.**

HUBER Technology offers a full range of superior equipment for achieving:
